

project. Kathy Manley was superb in her role as production supervisor. I also want to acknowledge the contributions of many others, including Pat Brown, Julie Dunn, and Tom Ziolkowski.

I would like to thank Peter Ashford, John Carroll, Sushant Gargya, Bill Morris, Ron Nash, Kris Stewart, and Felecia Vlahos for their assistance in finding reference material on specific systems. I am also indebted to the students who used previous versions of this material as a text and provided many valuable suggestions.

Contents

Chapter 1 Background

1

- 1.1 Introduction 1
- 1.2 System Software and Machine Architecture 3
- 1.3 The Simplified Instructional Computer (SIC) 4
 - 1.3.1 SIC Machine Architecture 5
 - 1.3.2 SIC/XE Machine Architecture 7
 - 1.3.3 SIC Programming Examples 12
- 1.4 Traditional (CISC) Machines 21
 - 1.4.1 VAX Architecture 21
 - 1.4.2 Pentium Pro Architecture 25
- 1.5 RISC Machines 29
 - 1.5.1 UltraSPARC Architecture 29
 - 1.5.2 PowerPC Architecture 33
 - 1.5.3 Cray T3E Architecture 37
- Exercises 40

Chapter 2 Assemblers

43

- 2.1 Basic Assembler Functions 44
 - 2.1.1 A Simple SIC Assembler 46
 - 2.1.2 Assembler Algorithm and Data Structures 50
- 2.2 Machine-Dependent Assembler Features 52
 - 2.2.1 Instruction Formats and Addressing Modes 57
 - 2.2.2 Program Relocation 61
- 2.3 Machine-Independent Assembler Features 66
 - 2.3.1 Literals 66
 - 2.3.2 Symbol-Defining Statements 71
 - 2.3.3 Expressions 75
 - 2.3.4 Program Blocks 78
 - 2.3.5 Control Sections and Program Linking 83
- 2.4 Assembler Design Options 92
 - 2.4.1 One-Pass Assemblers 92
 - 2.4.2 Multi-Pass Assemblers 98
- 2.5 Implementation Examples 102
 - 2.5.1 MASM Assembler 103
 - 2.5.2 SPARC Assembler 105

2.5.3	AIX Assembler	108
	Exercises	111

Chapter 3 Loaders and Linkers

123

3.1	Basic Loader Functions	124
3.1.1	Design of an Absolute Loader	124
3.1.2	A Simple Bootstrap Loader	127
3.2	Machine-Dependent Loader Features	129
3.2.1	Relocation	130
3.2.2	Program Linking	134
3.2.3	Algorithm and Data Structures for a Linking Loader	141
3.3	Machine-Independent Loader Features	147
3.3.1	Automatic Library Search	147
3.3.2	Loader Options	149
3.4	Loader Design Options	151
3.4.1	Linkage Editors	152
3.4.2	Dynamic Linking	155
3.4.3	Bootstrap Loaders	158
3.5	Implementation Examples	159
3.5.1	MS-DOS Linker	160
3.5.2	SunOS Linkers	162
3.5.3	Cray MPP Linker	164
	Exercises	166

Chapter 4 Macro Processors

175

4.1	Basic Macro Processor Functions	176
4.1.1	Macro Definition and Expansion	176
4.1.2	Macro Processor Algorithm and Data Structures	181
4.2	Machine-Independent Macro Processor Features	186
4.2.1	Concatenation of Macro Parameters	186
4.2.2	Generation of Unique Labels	187
4.2.3	Conditional Macro Expansion	189
4.2.4	Keyword Macro Parameters	196
4.3	Macro Processor Design Options	197
4.3.1	Recursive Macro Expansion	199
4.3.2	General-Purpose Macro Processors	202
4.3.3	Macro Processing within Language Translators	204
4.4	Implementation Examples	206
4.4.1	MASM Macro Processor	206
4.4.2	ANSI C Macro Language	209

4.4.3	The ELENA Macro Processor	213
	Exercises	218

Chapter 5 Compilers

225

5.1	Basic Compiler Functions	225
5.1.1	Grammars	227
5.1.2	Lexical Analysis	231
5.1.3	Syntactic Analysis	242
5.1.4	Code Generation	260
5.2	Machine-Dependent Compiler Features	272
5.2.1	Intermediate Form of the Program	272
5.2.2	Machine-Dependent Code Optimization	274
5.3	Machine-Independent Compiler Features	278
5.3.1	Structured Variables	279
5.3.2	Machine-Independent Code Optimization	284
5.3.3	Storage Allocation	289
5.3.4	Block-Structured Languages	294
5.4	Compiler Design Options	299
5.4.1	Division into Passes	299
5.4.2	Interpreters	301
5.4.3	P-Code Compilers	302
5.4.4	Compiler-Compilers	304
5.5	Implementation Examples	305
5.5.1	SunOS C Compiler	305
5.5.2	GNU NYU Ada Translator	308
5.5.3	Cray MPP FORTRAN Compiler	310
5.5.4	Java Compiler and Environment	313
5.5.5	The YACC Compiler-Compiler	315
	Exercises	318

Chapter 6 Operating Systems

325

6.1	Basic Operating System Functions	325
6.1.1	Types of Operating Systems	327
6.1.2	User Interface	328
6.1.3	Run-Time Environment	329
6.2	Machine-Dependent Operating System Features	331
6.2.1	Interrupt Processing	332
6.2.2	Process Scheduling	339
6.2.3	I/O Supervision	344
6.2.4	Management of Real Memory	354

6.2.5	Management of Virtual Memory	361
6.3	Machine-Independent Operating System Features	372
6.3.1	File Processing	373
6.3.2	Job Scheduling	376
6.3.3	Resource Allocation	379
6.3.4	Protection	383
6.4	Operating System Design Options	387
6.4.1	Hierarchical Structure	388
6.4.2	Virtual Machines	390
6.4.3	Multiprocessor Operating Systems	392
6.4.4	Distributed Operating Systems	395
6.4.5	Object-Oriented Operating Systems	398
6.5	Implementation Examples	400
6.5.1	MS-DOS	400
6.5.2	Windows 95	403
6.5.3	SunOS	406
6.5.4	UNICOS/mk	409
6.5.5	Amoeba	411

Exercises 413

Chapter 7 Other System Software

419

7.1	Database Management Systems	419
7.1.1	Basic Concept of a DBMS	419
7.1.2	Levels of Data Description	424
7.1.3	Use of a DBMS	427
7.2	Text Editors	431
7.2.1	Overview of the Editing Process	431
7.2.2	User Interface	432
7.2.3	Editor Structure	435
7.3	Interactive Debugging Systems	440
7.3.1	Debugging Functions and Capabilities	441
7.3.2	Relationship with Other Parts of the System	444
7.3.3	User-Interface Criteria	445

Chapter 8 Software Engineering Issues

447

8.1	Introduction to Software Engineering Concepts	447
8.1.1	Background and Definitions	448
8.1.2	The Software Development Process	449
8.1.3	Software Maintenance and Evolution	452
8.2	System Specifications	453

8.2.1	Goals of System Specifications	453
8.2.2	Types of Specifications	454
8.2.3	Error Conditions	458
8.3	Procedural System Design	459
8.3.1	Data Flow Diagrams	459
8.3.2	General Principles of Modular Design	465
8.3.3	Partitioning the Data Flow Diagram	466
8.3.4	Module Interfaces	470
8.4	Object-Oriented System Design	474
8.4.1	Principles of Object-Oriented Programming	475
8.4.2	Object-Oriented Design of an Assembler	478
8.5	System Testing Strategies	485
8.5.1	Levels of Testing	485
8.5.2	Bottom-Up Testing	486
8.5.3	Top-Down Testing	488
	Exercises	490
Appendix A	SIC/XE Instruction Set and Addressing Modes	495
Appendix B	ASCII Character Codes	501
Appendix C	SIC/XE Reference Material	503
References		507
